The "Content Complexity" Challenge

The harsh reality

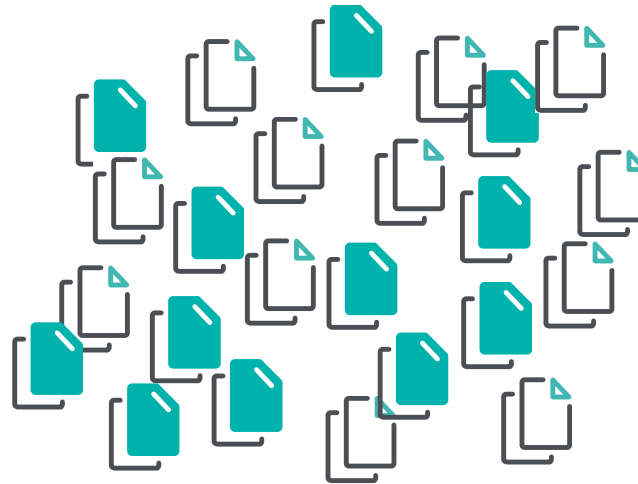

EXPENSIVE LEGACY FILE INFRASTRUCTURE

Disparate hardware-bound technologies

CHAOS OF CLOUD, SYNC AND SHARE APPS

100s to 1000s of different "thumb drives"

RAPIDLY EXPANDING DATA REQUIREMENTS

Security and compliance is an after-thought

Share and collaborate on large files

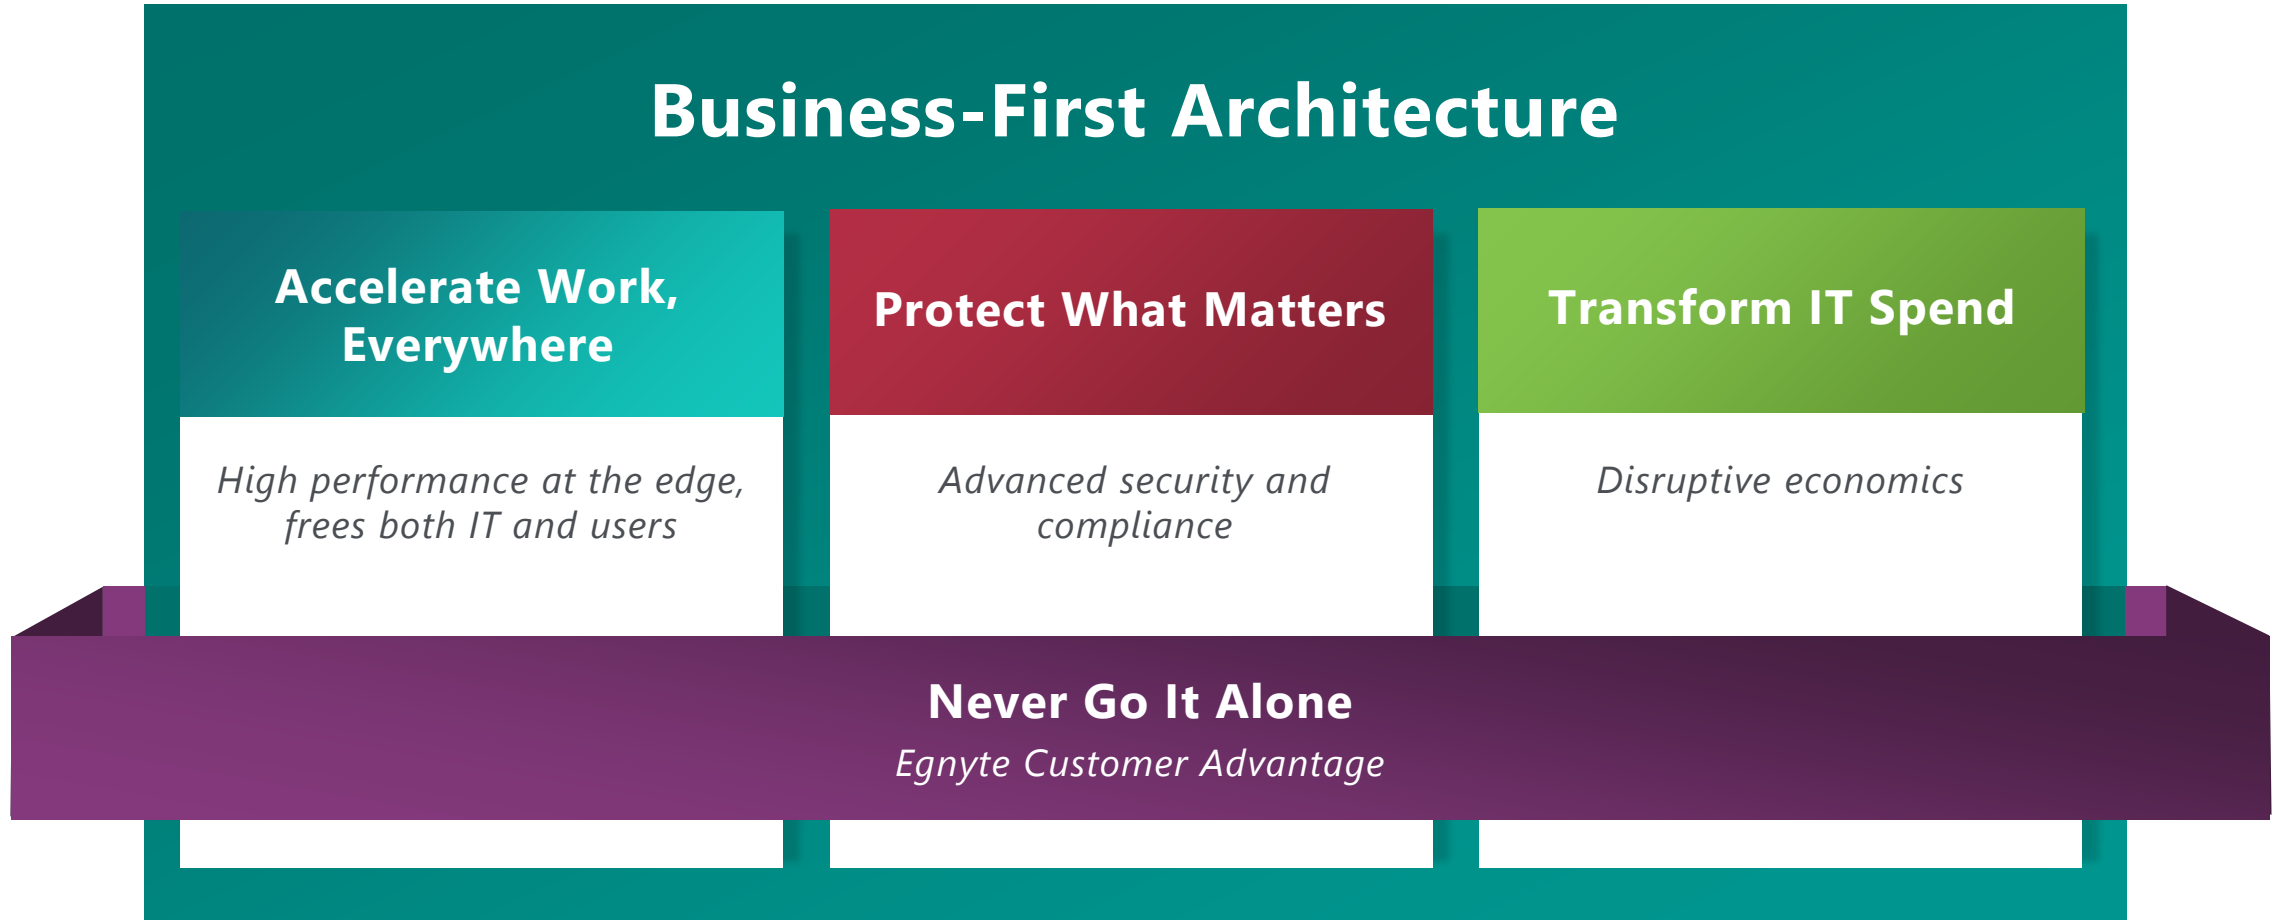

Data is more regulated, laws keep changing (e.g. GDPR)

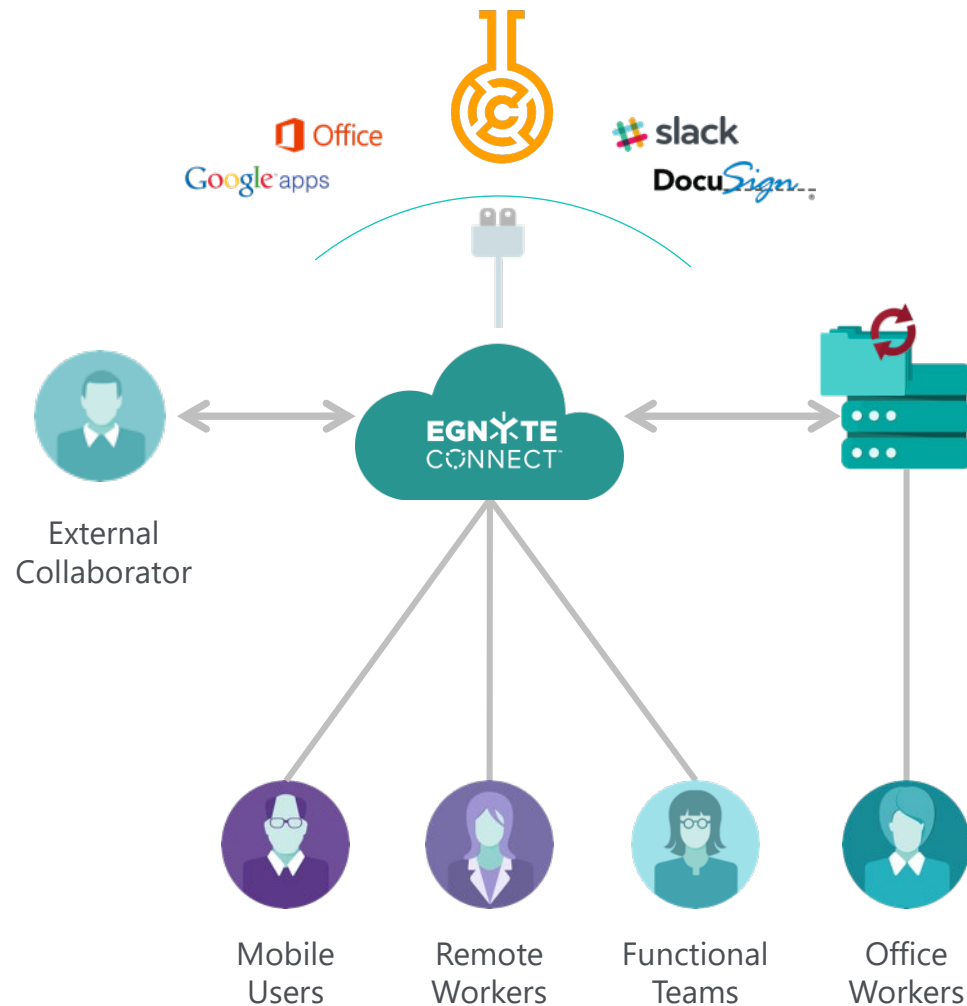

Sensitive content is at a higher risk

Why forward-thinking executives choose the Egnyte Content Platform

Our differentiators

EGNYTE CONNECTSM

Unified content repository

- Central control and security
- Migrate legacy storage, ECM
- Eliminate rogue solutions

Enhance collaboration

- Work from one source
- Work from anywhere
- Work from any device, interface
- Integrated apps

Benefits

- Lower cost and risk
- Enhanced productivity

INTRODUCING

EGNYTE

&

ChemAxon

Stage 1

Egnyte & ChemAxon Synergy

Access Egnyte directly from ChemAxon Synergy

The screenshot displays the ChemAxon Synergy web application interface. At the top left, the ChemAxon SYNERGY logo is highlighted with a blue oval. The main navigation menu on the left includes 'Team Members', 'Groups', 'Projects', and 'Resources'. The 'Resources' section is highlighted with a grey oval and contains the Egnyte logo and name. Below this, the 'Applications' section features two main cards: 'Compound Registration' (with 'OPEN' and 'LEARN MORE' buttons) and 'ChemAxon Assay' (with 'OPEN' and 'LEARN MORE' buttons). Each card also includes a 'Quick access' section with links like 'Register new compound', 'Upload file', and 'Staging area'. The top right corner shows the user email '@chemaxon.com' and a grid icon. A 'Questions? Get in touch!' button is located at the bottom right of the interface.

Coming soon to a cloud near you...

**Upload and Save directly from and to
Egnyte using -**

- ChemAxon Assay
- Compound Registration
